

PRODUCT ROADMAP

2019 | Q2

B1 USABILITY
PACKAGE

Our vision is to **inspire companies** to achieve **sustainable growth** and a **competitive advantage**, now and in the future.

Disclaimer

The following information is being shared in order to outline some of our current product plans, but like everything else in life, even the best-laid plans can be put to rest.

We are hopeful that the following can shed some light on our roadmap, but it is important to understand that it is being shared for **informative purposes only**, and not as a binding commitment.

Please do not rely on this information to make purchasing decisions because, ultimately, the development, release, and timing of any products, features or functionalities remain at the sole discretion of Boyum IT Solutions and is subject to change.

Product Summary

B1 Usability Package, or simply **B1UP**, is an **award-winning** solution designed to **tailor and automate** SAP Business One effortlessly, making it ready to face the **most diverse scenarios and challenges**.

PRODUCT VISION

Deliver the **best user experience** by tailoring and automating SAP Business One, Beas Manufacturing and Produmex WMS

About the Roadmap

The purpose of the **roadmap** is to communicate the direction and planned activities determined by Boyum IT Solutions to add more value to **B1 Usability Package**. This product roadmap describes planned innovation and the future direction based on our perception of the business value.

Recent innovations

Where is B1 Usability Package today?

Planned innovations

New features planned for release

Future direction

A proposal for growth throughout the product lifecycle

Product Development **Mindset**

Quality First

Why? To keep partners and customers confident by using a reliable and robust solution.

How? Fixing product bugs, working for stability, increasing automated test coverage, investing every day and every step on quality control.

User Experience

Why? To allow users to have a pleasant experience while completing their tasks easily and efficiently.

How? Improving languages and error messages, reviewing usability by reducing the number of clicks and making screen access more intuitive.

Your Voice Matters

Why? To improve our solutions based on real-life needs from SAP Business One partners and customers worldwide.

How? Sharing ideas with our partners, collecting information on common needs from our partners and customers, involving partners in the roadmap.

Planned Innovations

 Feature	 Description	 Value
Beas Manufacturing dashboards	Out-of-the-box Beas Manufacturing dashboards	Manage manufacturing processes with data in real-time, tracking performance indicators driven by industry best practices.
B1UP Search support for PMX WMS	Perform advanced searches across Prodimex WMS objects.	Easily find the information you are looking for with a unified search system that scans data from SAP Business One, Beas Manufacturing, and Prodimex WMS.
Dashboard navigation to PMX WMS objects	Navigate to Prodimex WMS objects from B1 Dashboard widgets.	Improve usability and interaction with Prodimex objects when creating your Dashboards with Warehouse Management data.
HTTP Triggers	Call HTTP endpoints from B1UP Universal Functions and B1 Print & Delivery Report Actions.	Enhance communication with your employees or business partners by enabling SAP Business One to send automated messages to Microsoft Teams or Slack channels (through out-of-the-box templates), or any endpoint service*.
B1 Dashboard enhancements	General improvements for B1 Dashboards	Take the best decisions with more options, versatility and ease of use to analyze data and performance indicators.
B1 Print & Delivery enhancements	General improvements for B1 Print & Delivery	Quality of life enhancements to make B1 Print & Delivery more flexible and easy to use.

* First version will only support anonymous HTTP authentication. Credential and token-based credential management might be added if there is a demand.

Future **Direction**

SAP Business One Lifecycle

SAP Business One 10.0 Support

64-bit Server Component

SAP Integration Re-certification

Cloud & Web

Expand HTTP Triggers

Expand B1UP Online Services

B1UP for SAP Business One Thin-Client

Integrations

Extend integrations with
Boyum Vertical Solutions

Future Direction

 Feature / Idea	 Description	 Value Hypothesis
SAP Business One 10.0 Support	Support for the upcoming SBO release.	Make B1 Usability Package available for SAP Business One 10.0 early adopters.
64-bit Server Component	Replace the current 32-bit Server Component	Follow SAP guidelines in full compliance with 64-bit operating systems.
SAP Integration Re-certification	Renew the SAP Integration Certification	Ensure our partners and customers that the solution, as always, follows the strict integration standards demanded by SAP.
Extend integrations with Boyum Vertical Solutions	Additional integration points with Beas Manufacturing and Produmex WMS.	Enrich customizing and automation possibilities for Beas and Produmex customers and partners.
Expand HTTP Triggers	Extension of functionality according to community feedback.	Enable SAP Business One to interact with other platforms by including features and extra out-of-the-box templates for HTTP Triggers.
Expand B1UP Online Services	Include more capabilities into B1UP Online Services, using SAP HANA Service Layer.	Less setup and updates from the customer's side. Higher availability. No versioning gap.
B1UP for SAP Business One Thin-Client	Support for the new SAP Business One web-based Thin-Client.	Enable B1 Usability Package on the SAP Business One Thin-Client, gradually offering core functionality (according to technical / extensibility possibilities).

You deserve **the best** from us

We work hard to deliver the best software for you.

Our reward is the benefit you take from the innovations and enhancements we design to make your life better.

We only ask for one thing:

Keep your software up-to-date.

We don't launch updates every day, so enjoy the ride

1. Go to download.boyum-it.com
2. Select your solution of preference
3. Download and install the latest package available

Don't miss the chance! On top of new capabilities, updates contain essential changes to improve the performance, stability and security of our solutions.
