

# PRODUCT ROADMAP

---

2019 | Q2

PRODUMEX  
SCAN

Our vision is to **inspire companies** to achieve **sustainable growth** and a **competitive advantage**, now and in the future.

# Disclaimer

---

*The following information is being shared in order to outline some of our current product plans, but like everything else in life, even the best-laid plans can be put to rest.*

We are hopeful that the following can shed some light on our roadmap, but it is important to understand that it is being shared for **informative purposes only**, and not as a binding commitment.

Please do not rely on this information to make purchasing decisions because, ultimately, the development, release, and timing of any products, features or functionalities remain at the sole discretion of Boyum IT Solutions and is subject to change.

# Product **Summary**

---

Produmex Scan is an easy-to-implement barcode scanning solution for Windows CE/Mobile devices which executes and automates SAP Business One warehouse-related inventory transactions and business flows in real-time.

With rapid deployment, ease of use and powerful customizations, it allows businesses to start scanning two hours after initiating the installation process, providing an accelerated ROI.

PRODUCT VISION

**Stand-alone high-performance automation  
of SAP Business One **inventory transactions**  
in real-time using mobile devices**

# About the Roadmap

The purpose of the **roadmap** is to communicate the direction and planned activities determined by Boyum IT Solutions to add more value to **Produmex Scan**. This product roadmap describes planned innovation and the future direction based on our perception of the business value.

## Recent innovations

Where is Produmex Scan today?

## Planned innovations

New features planned to be released

## Future direction

A proposal for growth throughout the product lifecycle

# Product Development Mindset

## Quality First

**Why?** To keep partners and customers confident by using a reliable and robust solution.

**How?** Fixing product bugs, working on stability, increasing automated test coverage, and investing – every day and in every step – on quality control.

## User Experience

**Why?** To allow users to have a pleasant experience while completing their tasks easily and efficiently.

**How?** Improving languages and error messages, reviewing usability by reducing the number of clicks and making screen access more intuitive.

## Your Voice Matters

**Why?** To improve our solutions based on real-life needs from SAP Business One partners and customers worldwide.

**How?** Sharing ideas with our partners, collecting information common needs from our partners and customers, involving partners in the roadmap.

# Recent Innovations

## IMPORTANT NOTICES

### Licenses

Starting from version 18.3, Produmex Scan is now fully integrated with the Boyum Portal. All licenses can be purchased and issued directly from the Boyum self-service portal. This means that the old license files cannot be used anymore, so when upgrading from a version older than 18.4, please make sure to obtain a license from the Boyum Portal.

### More information in the Boyum HelpCenter:

<https://support.boyum-it.com/hc/en-us/articles/360010566654-How-to-get-a-license-for-Produmex-Products->

# Recent Innovations

## Bin Locations

Allow changing target bin location allocated during a stock transfer draft.

Use Case: This allows customers to react to unexpected situations during a picking. E.g. the target location is being used or not available.

## Customization Platform

Further, enhance Scan customization abilities by allowing to define new lines for DataRepeater.

This is a powerful addition to the Scan toolset because it allows to define the number of lines each item on a list will display.

Use Case: When a customer wants to add extra information into lists and requires more space available.

# Planned Innovations

## Native Android App

- Platform R&D
- UI/UX R&D

# Q3 Planned Innovations

## Native Android App

- Maintain current install base don Windows CE support
- Mostly feature to features migration
- Renew and improve UI and UX

## Boyum Cloud-ready

- Multi-tenancy supported

## Beas Manufacturing integration

- Work seamlessly with Beas

## Boyum feedback system

- Installation information
- Most-commonly used flows and documents

## Customization Platform

- Screen customization
- Action configuration
- Flow configuration
- Query customization

# Q2/Q3 in detail

# Future Direction

## New Functionality

We want to be at the forefront of logistics and will keep adopting the best practices and processes.

- Produmex WMS and Produmex Scan will stay in sync in regards to the supported GS1 Ais.
- RFID support

## Investigation

We won't stick to the easy way. Here are some of the topics we are researching:

- UDI barcodes – a special case of GS1-128 (<https://www.gs1.org/healthcare/udi>)
- B-10 standard labels (Automotive Industry and others)

# Produmex WMS/Scan releases

Product roadmap with continuous innovation

◆ *Continuous maintenance delivery for all versions in maintenance*

# You deserve **the best** from us

We work hard to deliver the best software for you.

Our reward is the benefit you take from the innovations and enhancements we design to make your life better.

We only ask for one thing:

**Keep your software up-to-date.**

**We don't launch updates every day, so enjoy the ride**

1. Go to [download.boyum-it.com](https://download.boyum-it.com)
2. Select your solution of preference
3. Download and install the latest package available

Don't miss this chance! On top of new capabilities, updates contain essential changes to improve the performance, stability and security of our solutions.

# Boyum **World Tour** 2019

We offer 4 types of knowledge-transfer initiatives: Beas Manufacturing and Produmex WMS implementation workshops, as well as Beas Pre-sales and Boyum Horizontal trainings.
