

Improved usability of SAP Business One with the B1 Usability Package

Company Name

McRoskey Mattress Company
www.mcroscopy.com

Products and Services

Design and manufacturing of handmade mattress

SAP Solutions

SAP Business One
 B1 Usability Package

The McRoskey Mattress Company is a handmade mattress making firm in San Francisco, CA. Established by two brothers in October 1899, it has been trading continuously ever since.

Reasons for choosing Boyum

After the implementation of SAP Business One, McRoskey faced some issues that were impossible to solve within the software itself. B1 Usability Package was bought to solve one specific problem and over time they realized, that it made the usability of SAP Business One so much easier.

Functionality covered with Boyum add-ons and not through standard SAP Business One:

- Shop floor automation – we automated a 12 click process down to one click
- Reporting automation – we added customized reports to individual user home pages
- BP form enhancements – added deposits paid information to customer BP forms
- We run our entire manufacturing and retail company, 5 physical locations, with B1UP and one other small add-on.

Which benefits have you achieved after the implementation:

- Spectacular service
- The product is as good as our mattresses

"Today we could not run SAP Business One without the B1 Usability Package. I am a huge fan"

Rob Burge, Finance & IT, McRoskey Mattress Company
