Industry

Metal Surface Treatments

Products and Services

beas Manufacturing and B1 Usability Package

Number of users

Approximate number of users: 15

Limat, founded 1970 in Israel is a leading company in the metal surface treatment field and as a service provider mostly to exporting industrial companies.

Why choose Boyum and our add-on:

- beas Manufacturing was chosen in order to increase the operation efficiency and planning production in the plant.
- B1 Usability Package to increase flexibility and increase user friendly UI and to allow comprehensive business process / rules.

Functionalities covered by Boyum add-ons and not standard SAP:

- Sales order to production order
- Bill of materials and routing by operations
- Using phantom assemblies as a template for similar processes
- Production order management
- Quality control and COC to customers

Which benefits have you achieved after the implementation:

- Increased operation efficiency
- Increased transparency between operation and production floor
- Automated and uniformity processes
- Automated COA to the customers based on actual work orders and QC tests

“As a highly efficient and useful management and operational tool , SAP Business One with beas Manufacturing integrated, helps us to improve efficiency and information transparency across the company supply chain and reduce operating costs”.
