 beas Manufacturing

Plastifil gets projects and production under control with SAP Business One and beas Manufacturing

Founded 85 years ago, Plastifil manufactures products from stainless steel wire, pipes and sheet metal, launching around 250 projects every year – almost one a day. Looking to boost efficiency, the company deployed SAP Business One, version for SAP HANA, to drive production according to customer demand, optimize workflows and improve productivity.

Before: Challenges and Opportunities

- Looking to boost efficiency, control processes and achieve lean operations
- Needed a tool to optimize, track and analyze costs for all its product lines
- Wanted a management system to be able to provide performance insights

Why SAP Business One and beas Manufacturing

- SAP Business One, version for SAP HANA is a high-performance solution and enables integration of the beas Manufacturing solution to control production
- With MTF Business Solutions SA, the company has been able to go live with SAP Business One and beas Manufacturing in a very short time-frame

After: Value-Driven Results

- Having optimized workflows and cut red tape, Plastifil can now focus on its core business
- Management have fast access to KPIs to improve costs and monitor performance
- Improved productivity by almost 20%
- SAP Business One and beas Manufacturing are playing a pivotal role in the company's evolution

“In this improvement, which we are currently witnessing and hope to continue to drive forward, SAP Business One and beas certainly play a pivotal role.”

Martino Piccioli, President at Plastifil SA. Plastifil. Mendrisio, Switzerland.
