SAP Solutions

SAP Business One & Beas Manufacturing

CentroFlora has been serving the functional foods and pharmaceuticals markets for 60 years. With a fundamental need for traceability and safety, the company chose SAP Business One to bring integrity to its operations and track its manufacturing processes from raw material inputs to finished products. Now, these robust, auditable processes provide greater credibility in front of customers, while improved logistical efficiency means the business has been able to increase its profitability.

Why choose SAP, Boyum and our add-on:

- In need of end to end traceability of manufacturing processes from raw material to finished products.
- SAP Business One is built on market best practices and can be customized to specific needs.
- RAMO professionals have in-depth knowledge of SAP Business One and Beas Manufacturing.
- SAP Business One and the add-on Beas provide a complete, integrated solution.

Which benefits have you achieved after the implementation:

- Ability to access documents and information in real-time.
- Greater credibility in front of customers with verifiable control and traceability.
- Improved logistical efficiency enables increased profitability.
- Increased efficiency from a logistical point of view, that means they have gained time that is finally improving the profitability of the Group.

“To have a future, you must have security. To be secure you need SAP Business One and Beas Manufacturing”

Fernando Valsesia, Warehouse and Logistics Manager, Centroflora Group
