Number of Beas

Manufacturing users: 11

For 50 years, Mole Don Pancho has been making the sauce that is Mexico's national dish in the mole capital, San Pedro Atocpan. Now, with SAP Business One and Beas Manufacturing add-on, the company has full manufacturing planning and control, and decision-makers have accurate visibility of inventory and raw material costs, as well as up-to-the-minute insight into financials, sales and purchasing.

Why choose SAP, Boyum and our add-on:

- System that can support their growth in business as well as in transaction volume
- Manufacturing add-on designed to be fully integrated with SAP Business One

Functionalities covered by Boyum add-ons and not standard SAP:

- Obtain accurate information at exactly the right moment to be able to make better decisions
- Advanced manufacturing highly support the planning regarding cost control

Which benefits have you achieved after the implementation:

- Better management and production planning
- Improved inventory and cost control
- Objective, real-time information on raw material costs enables better purchasing decisions
- Everyone is all on the same page
- Process discipline encourages good habits

"Beas Manufacturing and SAP Business One help us have a clear overview of our production. The actual cost of the products is generated alongside the production, in real time. When the production is complete we now have all the corresponding cost."

Humberto Abaroa, SAP Business One Consultant. Mole Don Pancho. Mexico
