CARABELLI improves its **production control** and gains **real-time traceability** with Beas Manufacturing

CARABELLI is characterized by a considerable diversification of its activity fields, which can be divided into the following macro areas: Design and manufacture of personal protective equipment (PPE) against falls from heights. Design and manufacture of equipment and devices for laying and maintaining power and telephone lines. Staff training for climbing poles and pylons. Design and manufacture of metal and fabric accessories for furnishing and restyling railway carriages.

Challenges

- Implement a more comprehensive production management system than the SAP Business One standard while maintaining an integrated, managed system in a single user interface.
- Need for better real-time traceability.

Solution

- Integration of time tracking system, and powerful product-/batch- traceability feature.
- Reduction of missing postings related to material-issue during production activities.
- Improved display of BOM-related information and tasks.

Results

- Improvement of production control with an easy-to-use production-order interface.
- Ability to develop customizations related to their needs and way of working.
- Better management and recording of the costs.
- Significant improvement in the management of labor accounts.

"THE INTRODUCTION OF BEAS ALLOWS US TO MANAGE PRODUCTION IN LINE WITH THE REQUIRED PROCEDURES AND STANDARDS. MRP MANAGEMENT IS EASIER TO NAVIGATE THAN THE STANDARD SAP BUSINESS ONE."

Giorgio Liverani / Manufacturing manager
