We got better reports and **optimized utilization** of our resources with SAP Business One and B1 Usability Package

Simply Chocolate is based in Copenhagen and produce handmade chocolate bars with natural ingredients since 2011. Simply Chocolate is about lifestyle and lusciousness, and for everyone who loves the taste of chocolate, be it dark, milk, or white, filled or solid, with notes of vanilla, liquorice or seasonal berries. Copenhagen Chocolate Factory's handmade chocolate is produced with respect for age-old traditions and sold both in Denmark and internationally in carefully selected stores with a focus on design and lifestyle.

Challenges

- We had a lack of new reporting possibilities and needed a better overview of our old SAP Business One solution.
- Data could not be presented in a useful way and the finance department, in particular, lacked an overview of the company's key figures.
- Better tools were needed to present data and get the necessary overview of the company's key figures.

Solution

- We have had SAP Business One since 2012, and in 2018 we made a major upgrade of our ERP solution, where new modules such as B1Dashboards from the B1 Usability Package were added to the solution.
- We got much better reporting capabilities throughout the company, and we optimized the utilization of our resources considerably.

Results

- We got much more reporting and analysis opportunities with B1UP.
- In addition, it also led to better utilization of our resources, and we got a much better management of our production – from raw materials to the finished product being delivered to the customer.

"B1UP COMES WITH SEVERAL VERY SMART FEATURES AND FUNCTIONS, WHERE BI DASHBOARDS IN PARTICULAR HAS BECOME A KEY FUNCTIONALITY IN OUR SOLUTION AS IT GIVES US A QUICK VISUAL OVERVIEW OF OUR DATA. THE DIFFERENT DEPARTMENTS CAN EASILY SEARCH FOR THE DATA THEY NEED."

Christian Alexander K. Hasselsteen, Controller & IT-Support, Copenhagen Chocolate Factory ApS
