# INTERNEXT 2000, s.r.o. saves time and improves its processing of invoices by 100% with B1UP

INTERNEXT 2000, s.r.o. focuses on providing reliable Internet connection to households, companies, and organizations since 1996. They emphasize the use of the latest technologies at an affordable price, maximum reliability, operational safety, and quality customer service. They have built their own gigabit optical backbone network covering most of the Zlín region and parallel backup with radio links in coordinated frequency bands 18-38 GHz.

## Customer Challenges

- Problem with invoicing – The number of documents and clients increased.
- Loss of time and money
- The need to communicate with clients electronically.
- The issuing and distribution of invoices took 14 days of intensive work.
- Too many Excel spreadsheets.

## Solution

- Easy to use, simple system customization, and efficient implementation.
- B1UP expanded the ERP capabilities.
- Today, the complete processing of invoices takes 1 day.
- Great customization possibilities and opportunities to automate and facilitate operations while reducing errors.

## Results

- Able to capture a lot of data and distribute documents through electronic channels.
- Higher profit thanks to the optimization of processes. They used to spend lots of thousands on postage, but now everything is done by email.
- Perfect integration into the business environment.
- Processing time has been accelerated.

*"THANKS TO THE INTRODUCTION OF SAP BUSINESS ONE TOGETHER WITH THE B1UP ADDON, WE WERE ABLE TO SIGNIFICANTLY MOVE OUR COMPANY FORWARD BY FACILITATING BUSINESS OPERATIONS AND REDUCING ERRORS."*
