Produmex Scan

FEATURED PARTNER

Seidor Kenya Limited

Kenya Nut was established in 1972 in the Kenya highlands with a focus on growing quality macadamia & cashew nuts. This has since grown to include coffee, chocolates and oils. With over 4,000 employees, the company operates seven farms on over 8,000 acres, with a complete production system from seedlings to ready-for-sale products and an international market.

Customer Challenges

- The manual inventory process lacked any control when issuing products from the warehouse
- Many errors during the picking process
- We experienced delays in decision making due to a lack of full traceability
- There was also a lack of real-time updates when it came to inventory tracking

Solution

- It was time to find a product that would fully help tackle our inventory control issues.
- Already integrated into SAP Business One and provides real time inventory data.
- An easy to adapt solution so our employees could get up to speed fast

Results

- By using scanners, we gained real time postings into SAP Business One
- Inventory control is now at an optimum
- The logistics department are now more productive

"KENYA NUT MANAGEMENT CAN NOW GET ACCURATE REPORTS REGARDING STOCK AND DRIVE THE BUSINESS FORWARD"

Steve Adewole / Head of IT
