Marín Gimenez improved its production management and traceability with Beas Manufacturing

Marín Giménez is a company that specialized in fruit processing. The company's main objective is to produce the highest quality products with the maximum level of safety standards whilst maintaining competitiveness. The company's main activity is aseptic processing and preservation of fruits and currently supplies its products to the dairy, beverage, marmalades, and baby food sectors. technology.

Customer Challenges

- As the production system was not linked to the management system, it made stock management difficult.
- Inventory data was not in real-time, having to duplicate the work to update consumption. This meant duplicated work.
- Up-to-date stock was not available at the time.
- Difficulty to carry out traceability exercises.

Solution

- The production management and traceability improved, placing terminals in the plant to capture consumption information in real-time.
- This system allows the consumption of batches of raw material, having traceability in the system.
- Boyum plant terminals and product traceability reports.

Results

- Improved delivery times with customers.
- They produced 20% more than before.
- Ability to have stock in real-time helped them improve material purchases.
- By not duplicating work, they can optimize management times, allowing production employees to dedicate themselves to tasks that add more value to the production chain.

"THE IMPLEMENTATION OF BEAS HELPED TO ORGANIZE AND IMPROVE ALL THE DEPARTMENTS OF MY COMPANY. SINCE ALL THE INFORMATION IS IN THE ERP, IT ALLOWS ALL WORKERS TO CONSULT THE INFORMATION THEY NEED, AVOIDING EMAILS AND TENSIONS BETWEEN DEPARTMENTS."

José María Franco Morant / Manager
