Beas Manufacturing

## FEATURED PARTNER

Brain system srl

# Oleo Tecnica has **increased its control** of different production processes **by 70%** with Beas Manufacturing

Oleo Tecnica s.r.l. has been a specialist in producing and distributing flanges made per SAE J518 standard since 1976. It has 5,000 mq of covered surface used to keep ready stock. It helps to expedite customers' delivery excellently. Their main products range from split flanges, cetop flanges, straight to 9-degree flange connectors in various versions.

## Customer Challenges

- We struggled with many manual production processes that lacked automation to run efficiently.
- An obsolete system that needed enhancement and more flexibility.

## Solution

- We also needed a solution integrated with SAP B1 as it was one of the mandatory requirements.
- We opted for the solutions of Boyum IT Solutions because of the quality, innovation, and flexibility of Beas Manufacturing.

## Results

- We can now have a clear impact on our production processes and better integrate our machines.
- Saving time and shortening irrelevant processes allowed us to efficiently channel our efforts and energy.
- Avoiding inserting data manually enabled us to reduce our error rate.

*"HAVING BEAS MANUFACTURING PERFECTLY INTEGRATED WITH SAP BUSINESS ONE ALLOWED OUR TEAM TO AUTOMATE AND SPEND LESS TIME ON IRRELEVANT PROCESSES AND FOCUS ON THE MAIN TASKS. IN ADDITION TO THIS, HAVING A CLEAR PICTURE OF THE PRODUCTION COSTS."*

Sig. Paolo Nozza / CEO
