FEATURED PARTNER

Codestone Solutions Ltd

Nestled on a farm in North Cornwall, St. Eval is dedicated to producing a wide selection of high-quality candles that will enhance your home. Our skilled workers combine artisan methods with the finest wax and wicks to produce high-quality candles. We make unique scented and unscented candles, tealights, pillar candles, licensed candles, dinner candles and home accessories.

Customer Challenges

- We experienced steady growth but were being held back by a lack of IT support and an older-style niche ERP that was not performing at the required level.
- A high volume of manual-based processes, such as order management, put a strain on the business.
- Manual data entry was slow and led to mistakes.

Solution

- Codestone implemented SAP Business One with B1UP.
- This provides complete visibility and integration of St. Eval's business, including stock control, data management, and online shopping platform.

Results

- Data entry improvement - B1UP helps the St. Eval team ensure the correct fields are updated in SAP Business One.
- The solution is generating change for the better as processes become more streamlined and automated.
- The firm looks to focus on how lean manufacturing will deliver even more value.

"WITH ENHANCED SCREEN CUSTOMIZATION, EMPLOYEE ENABLEMENT IS IMPROVED, WITH OVER 95% OF ST. EVAL EMPLOYEES FEELING THAT THEY HAVE THE TOOLS TO DO THEIR JOB WELL"

Harry Young-Jamieson / Managing Director
