SAP Solutions

SAP Business One®,
Beas Manufacturing

Beas Manufacturing and SAP Business One allowed Tattile to **increase the productivity significantly**

Italian based Tattile designs and produces embedded vision systems and custom advanced solutions for industrial applications, road traffic control and the railway industry. After implementation of Beas Manufacturing together with SAP Business One they improved their daily work significantly.

Before: Challenges and Opportunities

- Looking to standardize various companies in the group with a unified solution

Why SAP and Beas Manufacturing

- SAP Business One and Beas Manufacturing together gives you a user-friendly interface that easily integrate with Tattile's product lifecycle management and project management applications.
- Brain System have a deep understanding of the company's business processes.

After: Value-Driven Results

- Reduce the extra hours for more than 20%
- Introduce a Kanban system for a more steady workflow and better transparency in the production.
- Dynamic dashboard that allow us access to all relevant information very quickly. It helps to know where we are and compare it against the budget.

Featured Partner

"In only a few clicks we get all the data we need, which has made our daily work so much easier for us."

Stefano Bianchetti, Material Manager, Tattile
