MSS Seidor

# "CERMER" has achieved an improvement in the control of its production processes with Beas Manufacturing and B1UP

"CERMER" is a Spanish company, leader in the manufacture and marketing of ceramic packaging for the food sector. They are specialized in the conception and personalization of ceramic containers, totally reusable and environmentally friendly. Its customers are part of segments as varied as desserts, prepared dishes or dairy products. The ceramic packaging of "CERMER" is distributed worldwide, reaching the US, Russia and even Australia.

## Customer Challenges

- Incorporate the production process within the ERP of the company, having data related to traceability and inventories to real time of your finished product and raw Materials.
- Inefficiencies due to lack of information.

## Solution

- The plant terminals show the information necessary to manage the workers.
- The management of articles / lists of materials is very simple for them, with a very intuitive visualization.
- Data has been installed as a culture corporate and allows them to establish goals focused on improvement continuation of its processes

## Results

- They have information about the hours of work of its machines, the quality of your product, downtimes, traceability of raw materials used during the production process and control over their inventories.
- Supervisors make decisions snapshots, helping their teams and acting quickly on modifications to make.

*"WE ARE ABLE TO MONITOR THE PROGRESS OF OUR MANUFACTURING, IDENTIFYING THE KEY IMPROVEMENT POINTS THAT ALLOW US TO OBTAIN A FINAL PRODUCT OF GREATER QUALITY. THE DATA IS NOW AVAILABLE FOR ALL DEPARTMENTS IN THE COMPANY, IMPROVING THE INTERACTION BETWEEN THEM."*

Guillem Cabedo / Purchasing Manager
