Beas Manufacturing

FEATURED PARTNER

Intit S.R.L.

Specialized in the manufacturing premium leather car interior parts, the Italian company Fionda needed an integrated system to reduce manual processes and digitally transform their work. Beas Manufacturing, together with SAP Business One, turned the graphical interface they used into a captivating, interesting and dynamic one.

Customer Challenges

- No digital bill of materials: everything was on paper
- Too much manual and offline work getting done with high error percentage
- Reports had to be done using Excel in several departments, one at a time

Solution

- Digital transformation of their processes
- Using every Beas module, from APS to MRP

Results

- The business registered less costs and time wasted after the implementation
- Every technician benefitted from it, as it replaced manual work and individual reporting

"WE FINALLY HAVE MADE IT THROUGH THE DIGITAL TRANSFORMATION PROCESS."

Maria Cristina D'Aliesio, Administrative Manager
