Produmex WMS, Beas Manufacturing

FEATURED PARTNER

SPS Gestão Empresarial LTDA

J.Assy is specialized in technology solutions for agribusiness. They are one of Brazil's largest investors in R&D in the industry. The company has a remarkable culture for innovation, represented by the high number of patented technologies achieved, the strong national market presence, and the pioneering technology delivered to the North American and European markets. From diagnosis in the field to after-sales, they improve and monetize the daily lives of farmers in several countries.

Customer Challenges

- Difficulty in managing the production and tracking of products.
- They spent a lot of time with spreadsheets to determine material purchases.
- Difficulties in scaling production and raw material delivery control.
- They controlled the output of serial numbered items in spreadsheets.

Solution

- Beas Manufacturing provided them a new perspective of production control, where they can rely on MRP (something that standard SAP did not provide).
- Manage the productivity and efficiency of machines and people.

Results

- They have increased their level of reliability, where they are no longer wasting energy.
- They started to optimize time, making the system work for them, thus achieving better management in all areas.
- The production and shipping improved by 75%.
- PCP improved by 85%.

"TODAY, WITH THE GROWTH OF THE COMPANY AND OUR ENTRY INTO THE WORLD STAGE, WE ARE ABLE TO PRODUCE AND SHIP VERY QUICKLY AND WITH QUALITY. "

Julio Cesar / Process Coordinator
