BOYUM SOLUTIONS

Beas Manufacturing

FEATURED PARTNER

SPS Gestão Empresarial

Spraytec manufactures and markets foliar fertilizer products specially formulated to avoid losses during application and provide nutrition, promote overall plant health, and aid in the control of disease in crops. Its products cover its customers' needs throughout the entire crop production season, starting at pre-plant weed control and finishing at harvest.

Customer Challenges

- Production processes were manual.
- There was a loss of raw materials and production errors were constant.
- Huge challenges with accounting, closure of inventories, production processes, and consumption of raw materials since they should all be in systems (launched).

Solution

- Processes become safer and traceable.
- With Beas the production process has become more organized.

Results

- Visible performance improvement.
- Improved organization of the production process.
- Improvement with monthly accounting and inventories within the accounting department.

"BY USING BOYUM, PROCESSES BECOME SAFER AND TRACEABLE. THE PERFORMANCE IMPROVEMENT IS VISIBLE."

Danilo Vanzella / IT Coordinator
