BOYUM SOLUTIONS

Produmex WMS,
B1 Usability Package

FEATURED PARTNER

Domani Business Solutions

Levanto decreased its fault ratio from 8% to 3% with Produmex WMS & B1 Usability Package

Based in the Netherlands, Levanto provides everything in the field of illuminated advertising, facade advertising, full color prints and in-store signing. They take care of everything that makes a company visible to the outside world. From the very first design to development, production, installation, service and everything in between. Levanto bring brands to life, from overwhelmingly large to the smallest detail.

Customer Challenges

- The old WMS system contained a lot of customization. During a major update of SAP Business One, systems were not aligned, and the WMS blocked all processes.
- Item labelling was not good.
- Generic items could not be identified properly.
- Inventory could not be found – picking wrong products.
- Management of the company was affected since business had to close down for a week.

Solution

- The B1 Usability Package is a big benefit for the company because of the validations and checks that are possible on the user defined fields.
- Produmex WMS are base to all business processes of the company. Full visibility of the movement of inbound, internal, and outbound goods. Stock and inventory are always clear.
- Customers that need insights about their order history are easily served by sending overviews/insights that can be easily downloaded.

Results

- Optimized warehouse operations.
- The serialized numbers make products easily to trace. Throughout the supply chain products can easily identified by this.
- There is full visibility of the movement of inbound, internal, and outbound goods.
- Stock and inventory are always clear.

"HUGE TIME SAVINGS AFTER IMPLEMENTING THE SYSTEM. AFTER OPENING A SECOND WAREHOUSE NO EXTRA FTES NEEDED."

Luuk de Kunder, Owner
