# Having SAP Business One, Beas Manufacturing and Produmex WMS all in on one, gives transparency on everything that's going on

Spasciani SpA is a leading company in breathing protection in Italy. They produce a wide range of respiratory protective devices, addressing the needs of fire and rescue and police services, industry, utilities, petrochemical, shipping, offshore around the World. Every possible risk associated with breathing has been addressed by Spasciani with a broad range of products, which have been created, designed and produced with the sole aim of protecting human life.

## Challenges

- Our business challenges were to increase our market and expand successfully into new ones. Prior to implementing Boyum product we were lack in efficiency in both production and logistics and in order to move better and forward there was the need to have WMS and Production on the same platform as SAP Business One offers.

## Solution

- The possibility of having all our technical solutions on one database is the reason why we decided to change the existent ERP. The choice to give preference to Boyum Solutions by moving to SAP Business One was dictated by the fact that we found their systems innovative and dynamic. Furthermore, in our business, trackability is crucial and the integration between Beas and Produmex was evaluated a great solution.

## Results

- Print and Delivery improved drastically the efficiency of the Purchasing and Sales departments, while Production and Logistic have definitely seen the most important impact in terms of reshaping the processes and optimize efficiency thanks to BEAS and Produmex.
- it is evident that the entire team has no more wasting time "managing" the ERP issues, thus gaining much more time to focus on business activities

*"HAVING SAP BUSINESS ONE, BEAS AND PRODUMEX ALL IN ON ONE, GIVES TRANSPARENCY ON EVERYTHING THAT'S GOING ON WITH ALL THOSE IN THE COMPANY WHO ARE INVOLVED, THUS HAVING AN INTEGRATED SYSTEM WORKING SMOOTHLY WITH A SINGLE POINT OF CONTACT IF ANY ISSUE ARISES."*

Andrea Spasciani / Managing Director, SPASCIANI SpA
