

Boyum add-on(s): B1 Usability Package (B1UP)

Reasons for choosing Boyum:

Boyum was recommended to us to be able to avoid human errors, save hours in data entry and invoicing, automate the usability of our users and make validations that are key for the business process.

Functionality covered with Boyum add-ons and not through standard SAP Business One:

- ✓ **Advanced Validations** to control our business processes
 - ✓ Using **Macros** to automate different user actions which saves us time
 - ✓ **Function Buttons** can give a lot of usability and many mouse click less to navigate through SAP Business One
 - ✓ Configuring **SQL reports** in a flexible way with many usable options to display it
 - ✓ Being able to set **Mandatory Fields** so the users will not forget to enter important data
-

Key benefits:

B1UP helps us entering correct data and thereby avoid that errors occur and validations for key process

"The B1 Usability Package is the perfect add-on that complement the SAP Business One functionality and make the users love SAP Business One".

*Mauricio Rodriquez,
IT Manager*
