Solutions

SAP Business One & Produmex
WMS Add-On

In order to execute its healthcare-dedicated logistic services in an optimum way and in accordance with the regulations and its customers' requirements, Movianto relies on SAP Business One® and Produmex WMS to enable them to execute their business processes and logistics operations in a transparent and documented (traceable) way.

Why choose SAP, Boyum and our add-on:

- SAP Business One and Produmex WMS form a strategic platform that supports the planning, execution, warehousing, and collaboration needs of the Movianto service organization
- Products that integrate fully with customers' SAP ERP application
- Expertise from Produmex in the area of third party logistics and the life sciences industries

Which benefits have you achieved after the implementation:

- Increase of efficiency and productivity and error and cost reduction through automation of logistic processes, including goods receipt, put away, picking, packing and shipping
- Reliable and up-to-date information about inbound and outbound shipments, as well as current inventory levels and available-to-promise targets
- Accurate and consistent logistic services invoicing based on transparent arrangements with customers

'We have been using SAP Business One and PDMX WMS since 2008 to manage and optimize our logistic services to our life sciences and healthcare customers. Both systems have successfully evolved along with our needs.'

Dennis Willemyns, IT Manager Benelux, Movianto
