

Centrolflora extracts more value from botanicals with **SAP Business One®**

With four manufacturing units in Brazil, Centro Flora has been serving the functional foods and pharmaceuticals markets for 60 years. With a fundamental need for traceability and safety, the company chose SAP Business One to bring integrity to its operations and track its manufacturing processes from raw material inputs to finished products. Now, these robust, auditable processes provide greater credibility in front of customers, while improved logistical efficiency means the business has been able to increase its profitability.

Before: Challenges and Opportunities

- Markets demand high levels of safety and security
- Needed end to end traceability of manufacturing processes from raw material to finished products
- Looking to support greater integrity and robustness

Why SAP and Partner

- SAP Business One is built on market best practices and can be customized to specific needs
- RAMO professionals have in-depth knowledge of SAP Business One and beas
- SAP Business One and the add-on beas modules provide a complete, integrated solution

After: Value-Driven Results

- Provides integrity across all departments
- Ability to access documents and information in real-time
- Greater credibility in front of customers with verifiable control and traceability
- Improved logistical efficiency enables increased profitability
- With SAP Business One they have increase significantly their efficiency from a logistical point of view, that means they have gained time that is finally improving the profitability of the Group

“To have a future, you must have security. To be secure you need SAP Business One and RAMO team working.”
