## SAP Solutions

Beas Manufacturing

Fercad Electronics is a contract manufacturer assembling printed circuit boards for a wide range of industries. Waltraud Aumüller, CEO at Fercad, puts it this way, "In our company, manufacturing is the main process. That's why we benefit very much from the perfect integration of production, material management and controlling."

### Before: Challenges and Opportunities

- Shorten delivery times
- Improve item management
- Simplify customer warehouse management
- Ensure real-time visibility of inventory

### Why SAP and Beas Manufacturing

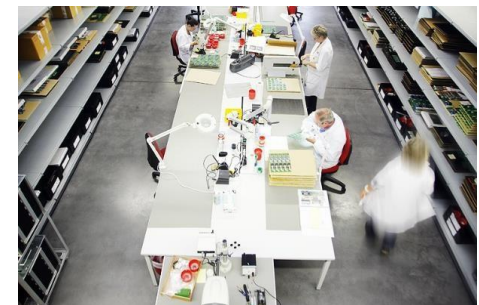

- Manufacturing and Materials management are seamlessly integrated into the complete business processes of SAP Business One
- Transparent determination of production costs

### After: Value-Driven Results

- Large amount of items (12.000), good to handle with scheduling tools
- Fast production cycle due to optimal item structure Current status of production visible at any time Highly flexible and differentiated assignment of WIP

*"Beas Manufacturing we were able to enhance significantly our manufacturing processes' efficiency, which helps us being ready for the future."*

Waltraud Aumüller, CEO, FERCAD Elektronik GmbH
