Dreiling Maschinenbau GmbH

[www.dreiling-maschinenbau.com](http://www.dreiling-maschinenbau.com)

### Industry

Development, production and assembly of special purpose machines

### Employees

120

### SAP Solutions

8 Beas Manufacturing users,  
18 SAP Business One users.

Since the foundation of the Dreiling Maschinenbau GmbH in 1982 by Engelbert Dreiling, the company has specialized in the development, production and assembly of special purpose machines, plants, fixtures, milling heads and the manufacturing of gears. At the production site in Geisleden they are able to carry out small and large scale project thanks to their qualified employees and a production area of 3 000 m<sup>2</sup>.

### Why choose SAP, Boyum and our add-on:

- In the production of individual unique machines, flexibility is the most significant ability for the company
- SAP Business One and Beas Manufacturing are able to adapt to every need and provide the overview and control to keep our employees on top of all our processes

### Which benefits have you achieved after the implementation:

- Able to react much faster to the needs of customers and improve the production efficiency
- Ability to instantly track their data and relate it to the customer specific order or similar jobs in our history
- Combined with the reporting function of open orders, the employees are able to work far more targeted and productive than before

*“The real-time comprehension of our processes enables us to instantaneously react upon customer request and provide them with backed delivery times.”*

Sven Dreiling, CEO, Dreiling Maschinenbau
