B1 Usability Package - Tailoring and automating SAP Business One
B1 Usability Package

boyum it

Deliver a seamless user experience by customizing and automating SAP Business One to suit your exact business needs.

The B1 Usability Package (B1UP) is an award-winning solution designed to help companies of all sizes adapt SAP Business One without complex development. With B1UP, you enhance usability, streamline operations, and unlock powerful automation - all without writing a single line of code.

Make SAP Business One work your way

Every company operates differently, and while SAP Business One is a powerful ERP system, it can require adjustments to truly fit your processes. Traditional customizations often mean high costs and long lead times. B1UP offers a flexible, easy-to-use alternative, enabling rapid changes without deep technical expertise.

With B1UP, you can:

- Customize user screens and workflows

- Automate routine tasks and validations

- Improve user adoption and system satisfaction

- Support strategic growth with better system utilization

"The B1 Usability Package has allowed our company to operate at an optimal level. We've seen significant cost savings by streamlining processes through its enhancement capabilities."

Kate Burdge, Systems Manager, Seirus Innovation, Inc

Core benefits and features

1

Ensure data quality

Keeping your system data clean and accurate is fundamental for successful operations. With data validation rules, users are guided to enter information correctly from the start. Predefined templates speed up data entry while ensuring consistency, and powerful data management tools allow for mass updates across master data and documents - all without needing technical expertise.

2

Enhanced user experience

Adapting SAP Business One to your team's daily needs is easier than ever. Screen design tools let you customize layouts for each role, while in-app messages provide contextual guidance where it matters most. Productivity improves through quick actions like right-click menus, fast navigation buttons, and even Google-style data search. Users can also create items or partners directly from documents, and over 50 built-in enhancements further streamline how your team interacts with the system.

3

Streamline business processes

Work smarter by automating routine tasks and enforcing rules automatically. The validation system ensures compliance by applying business logic across the platform, and repetitive tasks can be scheduled through macros. Easily integrate external applications, pull exchange rates from global banks, and assign messages or tasks based on workflows. With seamless usability extensions for Beas Manufacturing and easy management of user roles and settings, your processes become more efficient and aligned.

4

Better decisions with real-time insights

Making informed decisions starts with access to the right data at the right time. B1 Dashboards deliver real-time insights through interactive widgets accessible from anywhere. Visual summaries, dynamic charts, and pop-up overviews turn raw data into clear trends. Whether you're using HANA or SQL, you can build custom reports - or stick with familiar Crystal Reports for polished outputs. With accurate, up-to-date information, your business can respond faster and plan smarter.

Ensure data quality

Data-check
Create validation rules to ensure accurate data entry

Template system
Use predefined templates to enter data quickly and accurately

Data management
Apply mass updates to master data and documents

Enhanced user experience

Screen design
Tailor SAP screens to each user's needs

Custom messages
Deliver contextual guidance with in-app messages

Usability tools
Add buttons, right-click menus, and fast navigation

Data search
Quickly find information with a Google-style search bar

Quick create
Add items or partners directly from documents

Toolbox
Over 50 usability improvements built-in

Streamline business processes

Validation system
Define business rules and enforce them automatically

Automation
Set up macros for repetitive tasks and scheduled actions

Exchange rates
Pull updated rates from global bank providers

Beas Usability extension
Use popular modules within Beas Manufacturing

Admin tools
Simplify user rights and form settings management

Make better decisions

B1 Dashboards
Simplify user rights and form settings management

Data visualization
Eye-catching charts and pop-up summaries

Custom reports
Build tailored reports for HANA or SQL

Crystal reports
Use familiar formats to print and display reports

Customization Without Limits for SAP Business One

As your business grows and evolves, so should your SAP Business One environment. The B1 Usability Package (B1UP) gives you the flexibility to adapt your system without the complexity of coding, hiring developers, or enduring long testing cycles. With B1UP, you can tailor SAP Business One to fit your processes perfectly - no matter your size, industry, or stage of growth.

B1UP empowers you to personalize every aspect of your system - from screen layouts, menus, and tabs to navigation and shortcut buttons - creating an intuitive and productive workspace. Boost efficiency with advanced automation, interactive dashboards, and real-time data visualization, all from a centralized cockpit that supports fast, informed decision-making.

Save time, reduce errors, and maintain data quality through intelligent rule definitions and automated document creation. As your needs change, B1UP evolves with you, ensuring SAP Business One remains a powerful, flexible platform for long-term success.

With thousands of companies worldwide relying on it, B1 Usability Package is the must-have toolkit for unlocking the full potential of SAP Business One.

Bring Your Products To Life
