

PRODUMEX WMS FOR
LIFE SCIENCES

**EFFICIENCY, QUALITY,
TRACEABILITY AND REGULATORY
COMPLIANCE UNDER ONE ROOF**

Life Sciences companies face many unique challenges. In an age of enhanced consumer awareness and strict regulatory requirements (FDA, EMA, ...) life sciences companies have to ensure validated operation to ensure consistent product quality and patient safety. Their "license to operate" will depend on this!

At the same time operational efficiency in the area of logistics is of paramount importance too. The accuracy and speed of their logistic operations, the ability to ensure end-to-end traceability up to an individual serialized item of a specific batch in case of a product recall, ... – these capabilities will define the reputation of a life sciences company and ensure its profitability and growth.

Produmex WMS was designed with these needs in mind, featuring a wide range of generic and advanced warehouse management functions.

This comprehensive logistics solution also allows you to adapt quickly to new customer requirements and evolving legal regulations. Take a look and find out more about the high level of transparency and efficiency offered by our Warehouse Management System and discover how you can get one step ahead of your competition.

**"WE HAVE BEEN USING SAP
BUSINESS ONE AND PRODUMEX
WMS SINCE 2008 TO
MANAGE AND OPTIMIZE OUR
LOGISTIC SERVICES TO OUR
LIFE SCIENCES AND HEALTH-
CARE CUSTOMERS."**

"Both systems have successfully evolved
along with our needs."

Dennis Willemyns, IT Manager Benelux, Movianto
