Boyum IT Solutions appoints Jesper Ejlersen as Chief Financial Officer

Boyum IT Solutions today announces the appointment of Jesper Ejlersen as Chief Financial Officer and a member of its executive leadership team, effective immediately.

Jesper brings extensive international experience in financial management, business leadership and organizational development, including senior roles in the software industry. His appointment strengthens Boyum IT's financial leadership as the company continues to grow its business and support its global partner network.

His career includes CFO and CEO roles at Stibo Systems and financial leadership at EG, where his responsibilities included financial reporting and mergers and acquisitions. His experience spans international finance operations, forecasting, risk management and the use of data to support business decisions.

"Jesper brings a valuable combination of software industry experience, financial expertise and an understanding of how international businesses grow. His perspective will help us connect our growth ambitions with clear financial priorities and informed investment decisions, supporting the continued development of our business for partners and customers," said Jesper Andersen, CEO of Boyum IT.

As CFO, Jesper Ejlersen will work with the executive leadership team to support Boyum IT's strategic priorities and financial performance. His background in building international finance functions will contribute to the company's continued development across its markets and businesses.

"Boyum IT has a strong foundation in B2B software and long-standing partner relationships. I am particularly impressed by the breadth of the software portfolio and the number of global partners. I look forward to working with the team to build on that foundation, bringing financial insight and a practical approach to supporting the company's next phase of growth," said Jesper Ejlersen, CFO of Boyum IT.

About Boyum IT Solutions

Boyum IT Solutions helps small and midsize manufacturers and distributors connect and improve the processes across their Product Value Chain. Through a global partner network, the company provides solutions for SAP Business One, Microsoft Dynamics 365 Business Central and product information management, helping businesses Bring Their Products to Life.
